Accessibility Basics | Usability.gov

Web accessibility and usability are closely related, but the two terms are quite different. Although they're commonly used interchangeably, it's important to understand the differences between the two terms. In order to do so, we must establish the link between web accessibility and usability while outlining what makes each term unique.

Web Accessibility vs. Usability - Telerik Blogs

Accessibility and the Internet Visually impaired Internet users are able to navigate and use the web using screen readers like VoiceOver or Jaws. Screen readers, much like search engine crawlers, rely on signals in the code to determine the structure and the context of what they're crawling.

SEO + Accessibility: What You Should Know [Part I] - Moz

Accessibility is a subset of usability A web site is not usable unless it is accessible [14] Whilst usability implies accessibility , the contrary is not necessarily true [9]

The Difference Between Web Site Usability And Accessibility

Usability.gov Staff Writer. Friday, January 18, 2013. Usability and accessibility are slightly different lenses to assess user experience. It is possible to be strong in one area and weak in the other. Using either approach alone could result in an inaccurate view of your site's user experience. Evaluating your website with both usability and accessibility in mind gives all users the best possible user experience.

Usability and Accessibility: Looking at User Experience ...

Accessibility and Usability Coastline's goal is to provides an online environment where knowledge and ideas can be easily shared. This exchange is most meaningful when it promotes inclusion.
