A problem arises when you add more than one top-level domain. For example, let's say you have set up federation between Azure AD and your on-premises environment. For this document, the domain, bmcontoso.com is being used. Now a second, top-level domain, bmfabrikam.com has been added.

### Azure AD Connect Multiple Domains | Microsoft Docs

Axure basics : creating within-page interactions part 1 : anchors and visibility We have seen in previous posts the basic layout and functionalities of Axure, as well as how to add links between pages of a storyboard, to create a browsable storyboard.

### Two ways of creating accordions in axure, and how to use ...

A few years ago, I published a step-by-step tutorial to create a sticky version of a navigation menu in Axure, appearing once the user scrolls down.This is a great functionality for e-commerce (allowing to always display links to the cart, account, wishlist) and also content-heavy websites (like newspapers, for permanent access to search, share, back to top link, etc.)
