“Digital Labor”. The Internet as Playground and Factory

Digital labor or digital labour is a term for emergent forms of labor in post-Fordist economies, characterized by the production of value through interaction with information and communication technologies. Digital labor takes different forms from on-demand platforms, micro-working and the creation of content for digital platforms such as social media. Digital labor describes affective and social activities within capitalist modes of production not typically recognized as work, including the inc

Internet censorship and surveillance by country - Wikipedia

When considering the digital skills gap, this question is not asked often enough. Cornell University defines digital literacy as ‘the ability to find, evaluate, utilize, share, and create content using information technologies and the Internet’ 6. By this definition, digital skills are any skills related to being digitally literate.

Digital Skills in the Workplace | SkillsYouNeed

Educational and labor market reforms are needed to reduce the digital skill gaps. Digital skills are in short supply across the Middle East and North Africa region and some countries with high levels of digital expertise, such as Lebanon and Egypt, sometimes suffer brain drain to higher income countries, including the GCC.
