Four Fours Puzzle - Solution. The Puzzle: A popular mathematical pastime: Use exactly four 4's to form every integer from 0 to 50, using only the operators +, -, ×, /, (brackets), . (decimal point), √ (square root) and ! ...
 $100 = 4! \times 4 + \sqrt{4} + \sqrt{4}$ (Note: people have managed to do this for 1000s of numbers)

Four Fours Puzzle - Solution

The Four Fours Problem Solutions from 0 to 116, not including 113 which is probably not findable by the rules given. This puzzle is most commonly formulated as follows: "Given no more than 4 instances of the digit "4", represent all integers using a finite number of mathematical symbols and operators in common use." Notes on the Rules:

Four Fours - wheels.org

As a solution to the four fours problem (using the number four no more than four times to come up with the solution, 31 is equal to $(4!+4)/4+4!$

Using the number 4 four times can you make 1-100? - Answers

A list of the first 100 answers (solutions 0 to 99) to the Four Fours problem. A mathematical puzzle, where you aim to find an equation to match a given solution , using only four fours and a small set of operators. ... $1, (4/4) / (4/4), \text{johnv. } 2, 4/4 + 4/ \dots$

Four Fours Answer Key 1 100 - fullexams.com

Then multiply all the answers together to get the triple factorial. Therefore: $8!!! = 8 \times 5 \times 2 = 80$ $10!!! = 10 \times 7 \times 4 \times 1 = 280$. INT = the INTEGER function If you get a number with a decimal after it, just ignore the decimal bit. Therefore: $\text{INT}(3.741) = 3$ $\text{INT}(19.26) = 19$ We should like to apologise to any four wheel drive vehicle enthusiasts ...

MurderousMaths: The Four 4's Challenge

The lesson activity requires students to use up to four fours and any operation to make the numbers from 0 to 100. For example, $4 + 4 + 4 + 4 = 16$. Initially, students will use the more familiar operations, +, -, ×, ÷, along with brackets to create their equations. For example, $(4 \times 4 + 4) \div 4 = 5$.

Four Fours (Order of operations) - Calculate

Representation of numbers with four 4's Remark. There is a convention I applied to identities below, especially for the numbers beyond 100. As the table grew, some awkward formulas became more common.

Representation of numbers with four 4's

Four fours is a mathematical puzzle.The goal of four fours is to find the simplest mathematical expression for every whole number from 0 to some maximum, using only common mathematical symbols and the digit four (no other digit is allowed). Most versions of four fours require that each expression have exactly four fours, but some variations require that each expression have the minimum number ...

Four fours - Wikipedia

$20 = 4 + (4 / 4) * 4$ From the way I see it (must use four 4s, only using x, +, -, /), they're the only ones I see to be possible after spending a few minutes on it. This is because you can only get 0, 1, 8 or 16 with two numbers, and then you can only add, subtract, multiply or divide that by 0, 1, 8 or 16.

How do i get the numbers 1-20 with 4 fours? | Yahoo Answers

A list of contributed answers (solutions above 99) to the Four Fours problem - there are some gaps. A mathematical puzzle, where you aim to find an equation to match a given solution, using only four fours and a small set of operators.
