## Fascicles

peripheral nerves. The branches enter the muscles about one third of the way along their length, at motor points.

Motor points have been identified for all major muscle groups for the purpose of functional electrical stimulation by physical therapists, in order to increase muscle power.

The muscular system is responsible for the movement of the human body.

Attached to the bones of the skeletal system are about 700 named muscles that make up roughly half of a person's body weight. Each of these muscles is a discrete organ constructed of skeletal muscle tissue, blood vessels, tendons, and nerves.
