One experience I had with a Cat engine with low oil pressure after a rebuild. We changed the pump, regulator etc, etc trying to track down a low oil pressure issue. Finally we dropped the pan and pulled a bearing cap off. Standard bearings had been installed and the engine crank had been machined and needed oversized bearings.

Hey, we have a 2013 Prostar with the Maxxforce 13 engine, and recently it's using quite a bit of oil. We change oil every 25k miles, almost always running Rotella T6. Generally it would require 2 additional gallons of T6 between oil changes. The truck is running full egr/dpf delete, and currently has 420k miles. New turbos about 6 months ago.

13 8. May 15, 2017 0. I appreciate the feedback. I was just concerned, because I have two friends with the same engine, but their oil temp are running in the 165 to 175 range. I did a little research, and found the newer engines run at higher temps, but wasn't sure if mine fell into the category of newer.
