Use a design value table to find the  $F_b$  value for your floor joists. As an example, consider a room with a floor area of 10 feet by 11 feet, 2 inches built with No. 1 grade 2-by-6 Douglas fir-larch joists spaced 16 inches on center. A design value table shows that the joists have an  $F_b$  value of 1,495 and an  $E$  value of 1,900,000.
